About this report. This report was generated automatically from the information available to Global Data at the time of the request, including Global Data's own records and third-party sources. Records are matched on the details supplied and on name, date of birth, phone or email where those are held; a match is not proof that a record relates to the subject. Global Data does not warrant the accuracy, completeness or currency of the information and accepts no responsibility for decisions made in reliance on it.

The customer must make their own enquiries to verify any finding before acting on it. To support that verification, the research notes below record every search made, every decision taken and every record rejected, and the inferences and sources tables show the rule behind each conclusion and the query behind each result. Where a section states that a match is name-keyed or unverified, treat it as a lead, not a finding.

This report is not a credit report, must not be used as a substitute for one, and must not be solely relied on for any credit decision. No artificial intelligence or language model is used to resolve the identity, match records or compile this report, except in sections expressly marked as AI assisted. This report must be used in accordance with the Global Data Terms of Use and applicable privacy law.
